WILT WAR CONTINUED

Germany Again Hit by France

Minister Barthou, Replying
to Hindenburg, Declares
Berlin Responsible

French Willing to Forget If
Both Sides of Rhine
Keep Silence

PARIS, Sept. 25. (AP)—The French government today at the dedication of the monument to the fallen soldiers of the first world war, the Minister of Justice, Barthou, replying to the speech of the German Emperor, Hindenburg, declared that France was willing to forget the war if both sides of the Rhine kept silence.

Barthou, in his speech, declared that France was willing to forget the war if both sides of the Rhine kept silence. He said that France was willing to forget the war if both sides of the Rhine kept silence.

Will Rogers Remarks:

HOLLYWOOD, Sept. 25. [To The Editor of The Times:] Eleven people died listening over the radio to the fight. They just committed suicide waiting for the announcer to quit announcing the list of papers and tell them who won the fight.

Germany, this morning in the paper, wants everybody to disarm, saying they disarmed. Yes, but look what it cost to disarm them. Is it worth that, making a nation disarm? Besides disarming only prolongs wars. Both sides fight until they get 'em. We didn't have any when we went in last time. Less diplomats is what you want, not less wars.

Yours,
WILL ROGERS.

BISHOP ADDS HIS VOICE TO DARWINISM

English Divine Declares
Garden of Eden a Fable
and Embraces Evolution

LONDON, Sept. 25. (AP)—Another leading light of the Church of England, Rt. Rev. Ernest William Barnes, Bishop of Birmingham, has declared himself on the side of the scientists by asserting that the story of the creation as set forth in Genesis cannot be accepted as a solid fact.

The bishop, preaching in Westminster Abbey today, alluded to the recent visit of the British Association, and said that instead of clinging to old fables the people should welcome the new light of science.

When variations in employment wage earnings and wage rates are of the air force, who recently made a trans-Atlantic attempt with Capt. Macintosh, said today that a Free State airplane probably would be sent to the scene. It is thought that if there is wreckage it would be visible from the air, since the water off that coast is shallow.

Plans Prepared for Air Beacons

WASHINGTON, Sept. 25. — Plans and specifications are now in course of preparation for the installation of about twenty-four beacons along the coast of the United States.

The beacons, which will be installed along the coast of the United States, will be used to guide ships and aircraft.

The beacons, which will be installed along the coast of the United States, will be used to guide ships and aircraft.

INDUSTRIES FLOURISH

Wages Indicate
Good Business

National Conference Board
Declares Statistics
Give Confidence

Slight Variation in Earnings
Held to Prove Stability
of Conditions

NEW YORK, Sept. 25. (Exclusive)—Business progress during the past few months as reflected in wage and employment statistics constituting fundamental elements in measuring industrial activity inspires confidence rather than apprehension, and the recent stiffening of commodity prices is indicative of at least a normal seasonal increase in the demand for products. In the view of the National Industrial Conference Board, New York.

The element of confidence, in the view of the conference board, is to be derived from the fact that in spite of various outside influences that might be expected to act unfavorably on business, such as the approach of a Presidential election, disturbances in foreign affairs, a season of floods and generally unfavorable weather, industrial activity in the United States has suffered no noticeable depression even in the branches of industry which have made such unprecedented records during the past two years.

While employment and the total numbers of hours worked in manufacturing plants have declined slightly since last March and in July this year were somewhat lower than in the corresponding month a year ago, all such fluctuations recorded during the past twelve months averaged less than 5 per cent. according to the data collected by the conference board among about 5000 representative establishments in twenty-five different industries. Average weekly earnings per wage-earner, while showing a seasonal decline in July were at the same level as in the corresponding month a year ago.

Average hourly earnings, a sensitive indicator of wage rates paid were even 1 per cent. higher than in the same month last year. In April there has been as high as or higher than at any time during 1926.

FLUCTUATIONS SLIGHT
In interpreting these data, emphasized the board, it is not on such slight fluctuations as have occurred, declares Magnus W. Alexander, president of the conference board, rather on the minute fluctuations of the industrial activity which have caused frequent interruptions of business activity in most of the important industrial countries.

When variations in employment wage earnings and wage rates are of the air force, who recently made a trans-Atlantic attempt with Capt. Macintosh, said today that a Free State airplane probably would be sent to the scene. It is thought that if there is wreckage it would be visible from the air, since the water off that coast is shallow.

Irish Will Hunt Nungesser Plane

DUBLIN (Irish Free State) Sept. 25. (AP)—So much speculation has been caused by the renewed report that the French plane White Bird, piloted by Nungesser and Gail, had been seen to plunge into the sea off the west coast of Ireland, that the French Consul-General, A. M. Blanche, has asked the Irish authorities to make an investigation.

Commandant Fitzmaurice, head of the air force, who recently made a trans-Atlantic attempt with Capt. Macintosh, said today that a Free State airplane probably would be sent to the scene. It is thought that if there is wreckage it would be visible from the air, since the water off that coast is shallow.

Kidnaped Pair Slain in Mexico

MEXICO CITY, Sept. 25. (AP)—Bosillo Jimenez Bravo, Labor leader and Genaro Ramirez, politician and prominent in Labor circles, were kidnaped from a ranch at Tuzamapan, where they were visiting, taken off into the hills and decapitated and killed. The kidnapers were either bandits or political enemies.

A Very Present Help

WOMAN WHO WED EIGHT TIMES DIES

Six Husbands Passed
Away, One She Divorced,
Other Survives

BEAUVOIR (Miss) Sept. 25. (Exclusive)—Word was received today of the death of Mrs. Mary Ann Cain Fuller, 77 years of age, an inmate of the Jefferson Davis Soldiers' Home, who survived seven husbands and is herself survived by the eighth.

The surviving husband is A. J. Fuller, 90, a Confederate veteran, whom she met and married at the home. She leaves two children, the survivors of a family of twelve, and seventeen grandchildren.

Death stalked Cupid throughout the colorful career of Mrs. Fuller, removing one husband after another, so that, although she obtained a divorce from one of her husbands, she was a widow each time she walked to the altar.

The husband she divorced died before she married again. Four of the husbands were veterans of the Confederate army.

Born in a cottage on the Sunflower River, twelve miles from Ruleville, Miss. Mrs. Fuller married at 16 when she was regarded as the belle of the village.

Her first husband, Robert Henry Harrison, a newspaper editor, deserted her three months after the wedding and died a couple of years later.

By the time she was 35 Mrs. Fuller had buried four husbands and was the mother of twelve children. With one of the four, A. B. Morehouse, she lived eighteen years. He left her considerable property, which she lost. The next two husbands were farm hands on her former husband's estate.

The fifth husband deserted her and she obtained a divorce. He died before she took husband No. 6, a son of 23, named Ed McCreagh. Following his death she became an inmate of the Jefferson Davis Soldiers' Home, where she was married twice.

Through their varied matrimonial careers, Mrs. Fuller tactfully refrained from comparing her husband's death with the death of her husband's death.

Equatorial Ice Fields Explored

NEW YORK, Sept. 25. (AP)—Huge ice fields only fifty miles from the equator but at an altitude of 15,400 feet above sea level were found by Dr. James P. Chapin and B. L. Sage, two curators of the American Museum of Natural History, they reported today on their return from an expedition to the equatorial region of the East Congo.

Chapin and Sage, who spent eight months in Africa, say they scaled the lofty Ruwenzori Range and explored the vast ice fields. It was at this elevation that the ice fields were found. The native guides were afraid to approach the ice and turned back, leaving the two Americans to go on alone.

Planes Speed Legion Films

NEW YORK, Sept. 25. (AP)—A seaplane tonight aided in bringing to Broadway theaters the first motion picture of the American Legion parade in Paris last Monday. The film, which was transferred to the plane from the liner Leviathan, when the latter was 100 miles out from the American shore. The liner is scheduled to leave here Monday forenoon.

Within an hour after arrival of the plane here at 9 p.m. the films were showing in Broadway theaters.

Angeleno Killed in Utah Crash

PROVO (Utah) Sept. 25. (AP)—Mrs. Mary Fokner, 55 years of age, of Los Angeles, was killed here today when the automobile in which she was riding collided with a car driven by M. B. Cutler of Provo.

Three other persons in the automobile with Mrs. Fokner were severely injured and bruised. Mrs. Fokner came to Utah Thursday from Los Angeles to visit her daughter, Mrs. J. W. Zobel of Steel City.

Plans of Flight Balked at Start

CHICAGO, Sept. 25. (AP)—Because of engine trouble and needed parts, Capt. Frederick Gilles, who plans to make a series of flights from Detroit to Wellington, New Zealand, was forced to return to the Pioneer Field here after a hop-off for Iowa City.

The parts have been ordered from Detroit which is sponsoring the trip, and Capt. Gilles expects to hop again Tuesday.

PHOENIX MAN KILLED BY FRIEND HUNTING

PHOENIX, Sept. 25. (AP)—W. M. Mates, 47 years of age, of Phoenix, was accidentally shot and killed today by A. W. Bennett, also of this city, while the pair were hunting near the Stockton channel today after he, a Coroner's jury exonerated Bennett.

SPEED BOAT PILOT DROWNS
STOCKTON, Sept. 25. (AP)—Fred Trokey, 23 years of age, drowned in the Stockton channel today after he had fallen from his speedboat in making a sharp turn. Searchers found the body at a late hour.

CHINESE AIM AT AIR TRIP OVER OCEAN

Goodwill Plane Probably
Will Be Manned by Pair of
American Flyers

NEW YORK, Sept. 25. (AP)—A projected goodwill airplane flight across the Pacific Ocean to promote friendship between the United States and China was announced today by Dr. Chen Lai-Huang, a major in the Cantonese air force who has been touring the United States discussing Chinese problems.

Tentative plans provide for a flight from San Francisco to Shanghai, with stops at Hawaii, the Midway Islands and possibly Tokyo, Dr. Lai-Huang said.

Two American aviators, he said, have been interested in the project and will superintend the building of a three-engine plane this winter. He added the two probably will be the crew to fly the ship across the Pacific. They are Maj. Robert S. Miller of Minneapolis and Capt. Harold J. Lynch, president of the Chicago, Minneapolis and Seattle Air Transportation Company.

Chinese merchants in San Francisco and South China have organized to finance the venture, Dr. Lai-Huang said.

SHASTA AND TRINITY FIRES UNDER CONTROL

REDDING, Sept. 25. (AP)—With approximately 6000 acres burned over by the seventeen forest fires which have raged in Shasta and Trinity counties for the past week, foresters announced tonight that all the fires are under control. The fires were started by lightning.

TEN TAKEN IN DOPE RAID
OAKLAND, Sept. 25. (AP)—Ten Chinese were arrested and about \$2000 worth of narcotics seized today in a police raid here. Six complete smoking outfits were found.

TRACKS OF LEGION TRAIN WRECKED BY BOMBERS

Veterans on Way to Nice Escape
Injury in Blast as Plotters
Also Put Rocks in Way

NICE (France) Sept. 25. (AP)—Dynamiters and train-wreckers apparently tried to hinder the progress of the American Legion's two good-will special trains, but they reached here safely and the Legionnaires ran into another Paris welcome. A bomb was exploded on the track a few miles this side of Cannes at midnight, five minutes after an express had passed, but eleven hours before the Legion train was due. The rails were torn up, a deep hole made in the roadbed and fifty-seven telegraph and telephone wires were cut. The noise was heard at Golfe-Juan station by railroad employees who stopped approaching trains. The road was repaired quickly.

In a few hours another attempt was discovered east of here on the line near Monte Carlo. There rocks were piled on the rails, but these were removed by a track crew and the Legionnaires knew nothing about it. The authorities, however, decided to bring in all possible forces to guard and protect the American guests.

FIRST SNOW RECORDED IN DENVER

Scattering Flakes Cover
Mountain City as Mercury
Falls Toward Freezing

DENVER, Sept. 25. (AP)—The first snow of the season fell in Denver today. It was reported by the Weather Bureau as a "trace," but scattering flakes fell for some time. The snow was accompanied by near-freezing temperatures. At 3 o'clock the official report was 34 deg. above zero.

CHICAGO, Sept. 25. (Exclusive)—Winter is scheduled to make a new sweep across the Middle West tomorrow with a line of freezing temperatures passing from upper Michigan to the southwest through the central portions of Wisconsin, Iowa, Nebraska and Colorado, according to the Weather Bureau.

For Illinois and Indiana the prediction is showers and much colder. Indications are that the freezing point will not quite be reached, however. Further west, the forecast states, rain will be mixed with snow.

Storm warnings were issued for Lakes Superior, Huron and Michigan.

BANDITS IN TRAIN RAID; 30 KILLED

Ten of Escort on Espee
Wounded During Clash
With Attackers

MEXICO CITY, Sept. 25. (AP)—Delayed advices from Mazatlan received by El Universal say that thirty bandits were killed early last week when a band of more than 100 attacked a Southern Pacific passenger train between Barrancas and Laquema. Ten Federal soldiers and many of the bandits were wounded.

The train guard of about sixty Federal soldiers gave battle to the marauders for several hours and eventually drove off those who escaped death or serious injury.

None of the train passengers were hurt, though many bullets passed through the coaches.

Cathedral Soon May Open Again

MEXICO CITY, Sept. 25. (AP)—Mexico City's Catholic cathedral which was closed more than a year ago, when the great religious awe became effective, may be reopened soon. Government authorities have completed an inventory of the contents of the cathedral, which is announced, are valued at more than \$500,000 pesos (about \$4,000,000).

The cathedral, which was closed for keeping the cathedral closed was to permit completion of the inventory. Now that the work is done, Catholic residents hope its doors will be thrown open again.

ARCTIC SECRETS UNVEILED

Pulnam Baffin Island Expedition Succeeds and Party
Heads for Home, Radio Reveals

ON BOARD STEAMER MORRISSEY, OFF COAST OF LABRADOR (Via Radio Station SDNE, Auburn (N. Y.)) Sept. 25. (AP)—The Putnam Baffin Island Expedition, which left New York City early in June now is off the coast of Labrador, homeward bound, after three months in the Arctic region. The object of the expedition was to explore the unknown region and to make magnetic and radio observations.

The expedition is directed by G. T. Putnam, publisher, and the schooner Morrissey is commanded by Bob Bartlett, captain of Peary's ship. The scientific staff represents several of the great institutions in the United States, all of which have had a successful summer in their various fields. Due to the energy of the geographical unit of the expedition, 1000 square miles have been taken off the map of the west coast of Baffin Island.

GOOD HUNTING
It is important that the entire map of North America has been changed. A new range of mountains has been discovered and Peary and Hecia Straits have been visited for the first time since 1823.

It has been an exceptionally bad summer in the Arctic, but, regardless of fog, tidal bore and various other difficulties, the experienced men handling the various units of the expedition carried on to success.

ANCIENT HOUSES
Collections by the ethnologists representative of the life and culture of Baffin Island Eskimos were gathered. Ancient houses of a hitherto unknown people, which were excavated and many valuable specimens found. These people lived in the Arctic before the present Eskimos. Where they came from or where they went is not known. A

**GOVERNORS SEE
MOFFAT TUNNEL**
Delegates to River Meeting
Visit Noted Here
First Snow of Season Falls
at 11,656 Feet
Conferees Will Meet Today
to Settle Deadlock

BY C. A. JONES
Times Staff Correspondent
DENVER, Sept. 25. (Exclusive)—
Representing for the time the snarled
negotiations of the Governor's confer-
ence on the Colorado River compact,
the delegates from the seven basin
states today succumbed to the lure
of the Rockies and spent the day
visiting the Moffat tunnel.

**Party Tragedy
Inquest Delayed**

SAN MATEO, Sept. 25. (P)—Inquest
into the death of Thomas F. Brea-
shaw, San Francisco automobile ac-
cidentally killed while driving in
land, Or., was postponed today to
await reports on the analysis of
stomach contents.

**Arizona Pioneer
Dies in Phoenix**

PHOENIX, Sept. 25. (P)—J. A. R.
Barnes, 89 years of age, member of
the Arizona Legislature during the
past twenty years, died today at his
home in Phoenix.

**SOUTHERN FINANCIAL
VICTIM OF TRAGEDY**

BIRMINGHAM (Ala.) Sept. 25. (P)—
W. V. M. Robertson, Jr., 63 years of
age, prominent banker and presi-
dent of the Alabama Home Life In-
surance Co., died today at his home
in Birmingham.

**TEACH
HARVARD**

Sept. 25. (P)—
Dr. J. H. Burton, director of the
Smithsonian Institution, will be the
second to teach at Harvard.

SHOT AFTER CHASE

CHICAGO, Sept. 25. (P)—James
H. Jones, who was shot by a bank
man after an exciting chase in the
loop which followed his attempt to
cash a check alleged to have been
stolen from or lost by a college stu-
dent, died in the Bridwell hospital
today from the effects of his wounds.

FIRST LADY SETTING STYLES

Tourists Who Watch Mrs. Coolidge See Latest Trend
in Both Sport and Dress Wear

WASHINGTON, Sept. 25. (P)—Tourists waiting about the White House
to see Mrs. Coolidge start forth on a drive or a walk often are rewarded
not only by her appearance but by her smile, and just as Queen Mary of
England set the fashion for ostrich plumes to be used in every possible
way through the coming season, so Mrs. Coolidge is setting American styles.
Women are noting her smart costume—blue of heavy red silk and
suits and sport coats, each worn with a white blouse, showing a plait in
the back for fullness and buttoned to the throat in front. She wore a soft
white felt hat becomingly curved at the brim. For the opening of a new
theater this week she wore an emer-
ald-green gown of chiffon, and over
it a coat of soft white satin with a
white fur collar.

**KOENNECKE
SILENT ON
SECOND HOP**

German Flyer on Way to
America Believed to Have
Trouble Reporting Flight

LONDON, Sept. 25. (P)—Since Lieut.
Otto Koennecke, the German flyer,
left Angora, Turkey, at 6:30 o'clock
Saturday morning for Baara, Iraq,
nothing has been heard in Europe
of the progress of his airplane Ger-
mania, with which he is attempting
to make a flight from Cologne to
New York.

**TRUCKS OF
WARTIMES
STILL GOOD**

Old Army Equipment
Used to Transport Battery
700 Miles With Success

WASHINGTON, Sept. 25. (P)—Uncle
Sam's ten-year-old army trucks re-
corded a distinct achievement, in
army opinion, when they carried a
four-gun battery and all its equip-
ment 700 miles in eleven days over
roads that would have been tough
going for a light automobile because
of sand and grades.

**CLAIMS AWAITED
FOR CLARK BODY**

SAN QUENTIN, Sept. 25. (P)—Offi-
cials at San Quentin prison an-
nounced today that the body of Earl
J. Clark, hanged here Friday for mur-
der, will be held for relatives at least
until tomorrow.

**STATISTICS SHOW
VIENNA DOOMED**

VIENNA, Sept. 25. (P)—Vienna is
described as a "dying city" by the
newspapers today, which publish gov-
ernment statistics indicating a great
falling off in the birth rate and a
corresponding increase in the death
rate.

OVERHEAD ITEM

"It is very unlikely that this type
of ship ever will be used in another
war with a major nation, and there-
fore, sufficient enlisted officers and
men should be taken from this and
other obsolete kinds of ships and
given training on destroyers, as this type
of small, fast, cruisers will be used
should the nation ever again be en-
gaged in hostilities."

**PRAISE VOICED
FOR MAGRUDER**

House Naval Affairs Leader,
Upholds Charges

McClintic States Accusations
Hit Nail on Head

**"OVERHEAD" DRAWS CRITICISM
OF REPRESENTATIVE**

HOT SPRINGS (Ark.) Sept. 25. (P)—
Representative McClintic of Okla-
homa, second ranking Democrat
member of the House Naval Affairs
Committee, issued a statement here
today upholding charges recently
made by Admiral Thomas P. Magru-
der in an article published in the Sat-
urday Evening Post urging naval
economy.

CHARGES UPHOLD

"Admiral Magruder's article relating
to the inefficiency of the United
States Navy hits the nail on the head
when it comes to diagnosing some
of the evils which gradually are under-
mining the morale of the Navy," said
Mr. McClintic.

Controlled Quality

Why controlled quality adds to your car's life

Pan-Vapor tested PAN-GAS does everything you expect from good gasoline! It gives easy start—smooth acceleration—remarkable mileage—and dependable power!

Yet PAN-GAS does not subject your car to stresses and strains it was not designed to bear! PAN-GAS does not rack a motor! PAN-GAS does not leave a gummy residue in motor or carburetor!

The pan-vapor test proves this—it controls the high quality of PAN-GAS for your protection!

Your car lasts longer if you use PAN-GAS!

Claims Awaited for Clark Body

SAN QUENTIN, Sept. 25. (P)—Offi-
cials at San Quentin prison an-
nounced today that the body of Earl
J. Clark, hanged here Friday for mur-
der, will be held for relatives at least
until tomorrow.

Ordinarily the body of an executed
convict is buried in the prison cem-
etery if relatives fail to claim it with-
in twenty-four hours. Officials here
understand, however, that Clark had
written his young wife in Minot, N.
D., asking that he be buried there, in
the town where he had married and
"gone straight" until an amateur de-
tective suspected him and wrote the
Los Angeles authorities, who wanted
him for murder.

Clark is said also to have written
two Los Angeles officers who brought
him west for trial, asking them to
"chip in" and pay transportation
charges on the body.

Statistics Show Vienna Doomed

VIENNA, Sept. 25. (P)—Vienna is
described as a "dying city" by the
newspapers today, which publish gov-
ernment statistics indicating a great
falling off in the birth rate and a
corresponding increase in the death
rate.

The number of births, according to
statistics, fell from 40,833 in 1925 to
28,220 last year, or 4.3 births per
1000 population as compared to 6.3
births per 1000 in the previous year.
In Vienna the birth rate was 12.8
per 1000 population while the death
rate was 14.9 per 1000.

The newspapers regard these fig-
ures as of the gravest concern for a
small republic like Austria, where
every man counts.

Department Store]

Company

Los Angeles, equipped to do an annual
one of the largest department stores any-
where force of 3,000, which is doubled for
750,000 square feet of floor space, the
and 145 administrative departments.

the "People's Store," later becoming
served the community well, expanding
the development of Los Angeles as a mer-

electricity in the operation of this great
the store is unaffected—may be seen from
devices which electricity motivates:

In the Bakeries—dough mixers, bread
proofing machines, revolving ovens, egg
beaters, food choppers.

In the Candy Shop—chocolate mixers,
taffy pullers, caramel cutters, kiss wrappers,
chocolate dipping kettles, starch lock,
glass candies cooler.

In the Beauty Shop—hair clippers, vi-
brators, marcelling, permanent waving, hair
dyeing, violet ray treatment, sterilizing
hair dressing tools.

In the Garage—electric delivery trucks,
battery charging, electric welding, drills,
lathes.

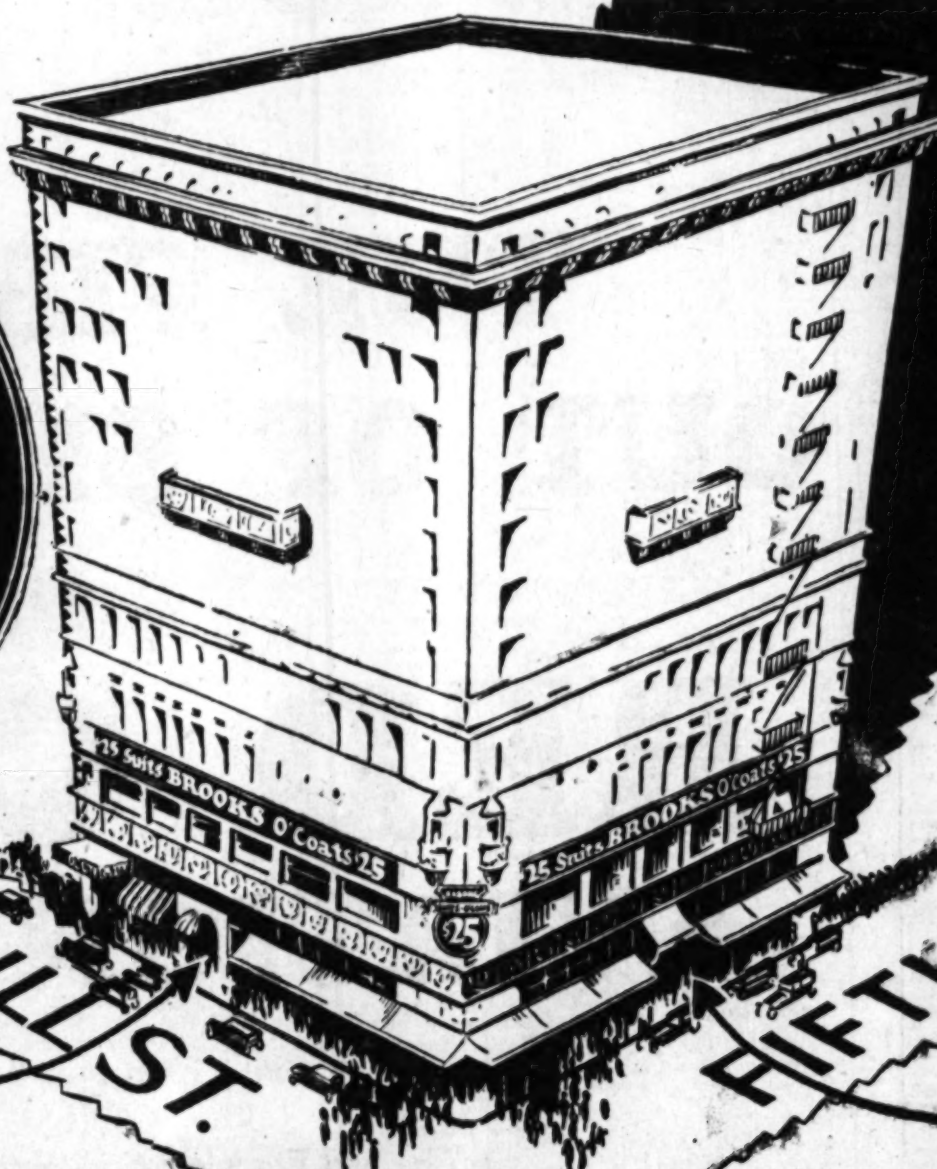

In addition, extensive electric equipment
is used in the Print Shop, Tailor Shop, Foot
Goods Stock Room, Mail Room, Music De-
partment, Carpenter Shop and Electric
Goods Department.

General lighting is, of course, electric

The One and Only Concern Where \$25 Buys Any Suit You See

Lindbergh said that it was the will to do that put him over the Atlantic. Brooks has had the will to do and has put over the greatest sensation of the clothing industry—giving the public the unrestricted choice of 20,000 suits and overcoats at just one single price . . . \$25.

If you think that a \$25 Brooks Suit is a cheap suit, we challenge you to equal it elsewhere for \$40.00 to \$50.00.

Yes, you bet, there was a time when a good suit could not be had for less than \$50.00 . . . but Brooks busted up that combination five years ago.

Today Brooks sells direct from its immense Eastern tailoring plant to you. Brooks has turned thumbs down to the hungry commission brokers, middlemen and jobbers—the parasites of the clothing industry, who made high prices a necessity.

Brooks now gives you the profits that those fellows used to get. If you had all of Rockefeller's money, you couldn't buy a suit of Clothes or an Overcoat that will give you more service, more style, more satisfaction than you will get from a Brooks Suit or Overcoat for \$25.

Not a Single Garment at a Higher Price Than \$25

In all our big stores—among thousands of smart, stylish Fall Suits—you cannot find one priced higher than \$25—nor any for less. Brooks has just one price—\$25. You know what a Suit or Overcoat is to cost you before you come into a Brooks Store—our \$25 price is not "bait" to get you into the store and sell you a Suit or Overcoat at a higher price. Brooks is the only men's clothing store where you are assured of this important feature.

New Fall Fabrics
Twists
Worsted
Cassimeres

Oh Boy! Such Great Suits for Fall

Pardon us for boasting, but this season ushers in the most wonderful fabrics, in the most colorful patterns that you ever saw. The new and popular Twists—colorful, serviceable, easy to tailor and perfect fitting.

Also the snappiest Tweeds and popular Worsted in stunning patterns—and Serges and Cassimeres, too—browns, grays—blues—and darker mixtures—the greatest galaxy of wonderful Suits and Overcoats in a score of years—and every one of them priced just—\$25.

Business and College Models

Brooks is mindful of the needs of both the business man and the college fellow. We have created styles in keeping with Fashion's latest dictates in our big New York tailoring plant where only the most skilled designers and tailors are employed. A Brooks style is an authentic style, despite the low price of \$25.

Buy Where the Variety is Unlimited

Brooks displays one of the largest assortment of Suit and Overcoats in America. There is not a whim of any individual that cannot be satisfied here be it style, fit, color, pattern or fabric.

The Brooks Label is a Guarantee

Every Brooks Suit or Overcoat carries a Gold Bond guarantee of satisfaction. You must be pleased. We stand unqualifiedly back of every garment that we sell. Our interest in you only begins when we accept your \$25 in exchange for a Brooks Suit.

Brooks Keeps Your Suits Pressed—FREE

Keep your suit looking new and it will last much longer. We press every Brooks Suit for you at any time—as often as you wish—Free.

"FIRST, I WILL GET WHAT IS MINE"

A PRUDENT man was making out checks for his monthly disbursements, and the first one he drew was to strengthen a Security Savings Account.

"First," he said, "I'll see that I get what is mine, out of what I have worked for. Then we will see what we can spend with the butcher and the grocer, the tailor and the department store."

Many plans are proposed for creating a savings reserve. None is so practical as this plan—to get YOURS safely laid away in Bank, FIRST. Then spend the rest as you need.

A savings account, to a careful man is both a necessity and a luxury. Give it the right of way.

GOOD-BYE PAINT BRUSH

No longer will the home owner be obliged to repaint every year or so, nor will he suffer the inconvenience of the six and seven day paint job. Now, the ordinary home may be completely finished and trimmed in one day. Enduro applied by compressed air is forced "into," not just onto, the surface. Being absolutely waterproof you may turn the hose on the walls and the surface will be as beautiful as the day it was applied. Just as good auto lacquers last during the lifetime of a car, Enduro will remain until you tire of the color, and the cost is no greater than ordinary paint.

HUGE BILL FOR FOREIGN MAIL

Seven Million Dollars Spent
on Service Last Year

Weight of Postal Matter Put
at 69,945,484 Pounds

More Than Half Carried in
American Vessels

BY FREDERIC J. HASKIN
WASHINGTON, Sept. 25. (Exclusive)—Last year Uncle Sam spent approximately \$7,000,000 to see that the letters and packages that his nephews and nieces wanted sent to foreign countries should be so sent. He had set aside \$1,500,000 more for that service, so it may be said he saved that amount. Also it may be said that the \$7,000,000 actually expended bought a lot of service in the way of delivering mail matter to the uttermost corners of the earth.

During the year 5,529,697 pounds of letters and postcards were dispatched by sea from the United States to foreign countries. That would figure up to well above 100,000,000 pieces of first-class mail. During the same period 97,870,937 pounds of newspapers, magazines, books and other printed matter, and 26,444,850 pounds of parcel-post packages also were mailed and transported abroad.

The total weight of this foreign mail matter was 69,945,484 pounds, and it represents a decrease of 2.65 per cent, compared with the preceding year.

Of all the mail dispatched from our ports to foreign countries, 56 per cent went in vessels of American registry and those vessels received 71 per cent of the compensation paid for the service. The weight of the mail carried across the Atlantic was 35,631,294 pounds and its cost for sea transportation was \$7,488,384.40, 42 per cent of the weight and 62 per cent of the compensation went to American vessels.

PACIFIC SERVICE
To Central and South America and the West Indies the mail dispatched weighed 18,973,696 pounds and the cost was a bit more than \$1,500,000; 68 per cent of the weight and 80 per cent of the pay went to American vessels. Slightly less mail by weight and in cost was sent to places across the Pacific, but American shipping had a larger share of it—79 per cent of the weight and 82 per cent of the compensation.

The total weight of parcel post dispatched to all foreign countries, transported by land as well as by sea, was 38,943,635 pounds, a drop of 13.7 per cent under the preceding year. The decrease was principally in the weight of parcels sent to European countries, and there was a slight increase in weight to Canada and Mexico.

The greatest value and the greatest service for his money that an American can get is what he gets for the stamp he puts on mail matter addressed to foreign countries. For 2 cents he can have a letter of one ounce or less delivered to the addressee in Great Britain and Ireland, Spain and the Spanish colonies, Canada, Newfoundland, New Zealand, Mexico, Central and South American countries, Western Samoa, the Windward Islands, the Dutch West Indies, Cuba and a number of other islands, or he can have a postal card delivered almost everywhere or anywhere in the world. Also he can have four ounces or less of merchandise samples delivered to practically any destination to which he may direct them. Letter rates to all other foreign countries not included in the 2-cent class are 5 cents for the first ounce or fraction thereof and 3 cents for each additional ounce or fraction thereof.

RATES OF EARLY DAYS
Perhaps a better understanding of what 2 cents or 5 cents buys in the way of mail transportation is conveyed if it is pointed out that not so long ago it cost as much as \$1.02 to have a letter carried from this country to Australia. Or it may be recalled that when the first general postoffice was established in London the rate of letter postage was 8 cents for the first fifteen miles, with a rising scale to 25 cents for 300 miles, and that less than 100 years ago, in 1840, to be exact, the first postage stamp was designed by W. Mulready and first brought into use.

In the American colonies the post-office first made its appearance in Massachusetts in 1639. Eighteen years later a postal service was established in Virginia under a law which required every planter to provide a messenger to convey the dispatches, as they arrived, to the next plantation, and so on, on pain of forfeiting a hoghead of tobacco for default.

In 1672 the government of New York established a weekly mail service between New York and Boston and one of the main-highway routes between the two cities still is known as the Boston Post Road. In 1683 William Penn set up a postoffice in Philadelphia, with weekly mails to places about the city and longer routes to the larger towns of Pennsylvania and Maryland.

POST RIGHTS GRANT
In 1691 Thomas Neale was granted a patent vesting in him the American post rights and the year following Andrew Hamilton was appointed Postmaster-General of America to undertake the task of establishing an intercolonial mail service. He visited all the colonies and enlisted the cooperation of all save Virginia. On May 1, 1693, the service was opened with a weekly post from Portsmouth to Boston, Saybrook, New York, Philadelphia, Maryland and Virginia. Five riders covered each of the five stages twice a week, save in winter, when the service was fortnightly.

The Crown purchased the good will of the American post in 1707 and from that time until the year prior to the Revolutionary War the General Postoffice in London controlled the service in America. In 1711 there was a weekly service between Boston and Maine and fortnightly service between Boston and New York, and in 1717 the mail was carried weekly between New York and Williamsburg, Va. Ten years later there was a service every two weeks between Philadelphia and Annapolis.

The Continental Congress at its second session in July, 1773, decided to have a postal system and Benjamin Franklin was placed at its head with a salary of \$1000 a year. Franklin shortly thereafter was transferred to the diplomatic field and his son-in-law, Richard Bache, was appointed to succeed him. In 1782 the Continental Congress authorized the Postmaster-General to establish a line of posts between New Hampshire and Georgia.

FROM LAW TO JAZZ
CHICAGO, Sept. 25. (AP)—Al Kvale, son of a Minnesota Congressman, who started out to become a lawyer, has opened an engagement at a Chicago theater, leading his own jazz band.

And now!

THE FIRST FIVE OUT OF SIX WINNERS used RED CROWN AVIATION GASOLINE

The San Francisco-Spokane Air Derby,—greatest aviation contest in the history of the Pacific Coast—is completed.

Nine of the eleven entrants, selecting with utmost care the fuel that must carry them successfully on their ardu-

ous flight, chose, and purchased, Red Crown Aviation Gasoline with its splendid record of triumphs. Their confidence was justified by the result. Of six prizes awarded, the first five went to the men who flew with Red Crown. Here is the record:—

Class "A" Winners

	WINNER	PLANE	FUEL
1st PRIZE \$1,500	Lipplate	Travelair	Red Crown
2d PRIZE \$1,000	Schoenhair	Int. Aircraft	Red Crown
3d PRIZE \$500	Breese	Breese Mon.	Red Crown

Class "B" Winners

1st PRIZE \$1,000	Langdon	International "City of Aberdeen"	Red Crown
2d PRIZE \$500	Warren	Travelair	Red Crown

All used Red Crown Aviation Gasoline, as did also, in their famous flights, the great aviators—

Lindbergh • Byrd • Maitland • Smith • Jensen

It is rarely if ever that so signal a tribute is paid to a manufactured article as is evidenced in the continual and successful choice of Red Crown Aviation Gasoline by famous Airmen whose lives often depend upon an unflinching and powerful fuel.

Nettleton Shoes

The illustration is a black and white line drawing. The upper portion shows two men in a workshop or shoemaker's shop. One man, wearing a hat and a long coat, is seated and working on a shoe. The other man, also in a hat and coat, stands beside him, observing or assisting. They are surrounded by various tools and materials, including a large wooden block and a box. The lower portion of the illustration features a large, detailed drawing of a single shoe, specifically a buckminster style, which is a type of oxford shoe with a distinctive brogue pattern on the toe cap. The shoe is shown from a side profile, highlighting its laces and sole.

CHEERFUL CHAFF

BY TIMES READERS

WRITE FOR THE "MOVIE" AND WIN CASH PRIZES

The Los Angeles Times produces a popular fun reel called "Cheerful Chaff," consisting of the twelve best jokes submitted weekly by readers. Twelve \$1 prizes are awarded each week, the names and addresses of winners together with prize-winning jokes appearing on the screen.

Everyone is invited to send jokes. No formal letter is necessary. Just let your jokes, as many as you wish, sign your name and address and mail to "Cheerful Chaff Editor," Los Angeles Times. Jokes for the screen must not exceed thirty words.

Selections of jokes too long or otherwise not adapted for screen use are accorded a place of honor as The Times comic page, receiving a certificate of acknowledgment.

OIL SEARCH LEADS TO SEA

Operating Companies Prepare Plans for Superderrick in Submarine Drilling Campaign at Seaciff

BY HOWARD C. KEGLEY

In the Seaciff district, six miles west of Ventura, the oil industry is about to undertake one of the most complex engineering tasks it has faced in the entire world.

Engineering plans are now being made for breakwaters and derrick foundations which will be built in the Pacific Ocean for the purpose of enabling operating companies to drill deep oil wells a considerable distance from shore.

Summerland has for thirty-five years furnished the Pacific Coast with an example of oil development in the surf, but the Summerland wells are shallow ones, few of them being more than 300 feet deep. All of them were drilled from platforms erected on the beach.

The situation at Seaciff will probably be the other extreme. Present indications in the two Hobson wells in the Seaciff district indicate that the oil is at a depth of 800 feet. The Hobson wells are at a distance of a quarter of a mile from the shore.

The Pan American Petroleum Company has already struck 100 feet of oil at a depth of 800 feet in the Hobson wells. A stone's throw back from the water's edge, better oil is expected at depths between 400 and 500 feet, and if the well is a good producer, and conditions are favorable, the company is planning to start a second line of wells out in the water.

The American Petroleum Corporation, which holds a State permit to drill on a strip of ocean frontage 1400 feet long, just west of the Hobson wells, is already preparing engineering specifications and blueprints for the foundation of a well, the working of which will be below mean high tide. This means that for a part of each day the waves will be washing in across the derrick floor.

The thing about this undertaking which makes it the most complex engineering project of the oil industry is the fact that the Hobson wells are at a distance of a quarter of a mile from the shore, and the Hobson wells are at a distance of a quarter of a mile from the shore.

HUGE PUMPS AT WORK IN MINE SHAFT

Three Lift 3750 Gallons Per Minute for Calumet and Arizona Company

By K...

PHOENIX (Ariz.) Sept. 25. (Exclusive)—The largest pumping operations in Arizona mines are those of the Calumet and Arizona Company, at its Junction shaft, from which is handled most of the water of the Warren district.

Ed Irving, the company's mechanical superintendent, states that the pressure from the 2200-foot level approximates 1000 pounds to the square inch, necessitating installation of the strongest equipment and of heavy materials. At the 2200-foot level are four pumping units, two with capacity of 1000 gallons a minute, one of 1250 gallons and one of 1800 gallons, installed at a cost of \$450,000.

Power is electric, from the company's smelter in Douglas, with auxiliary generation plants available at the shaft head and in Phoenix and Douglas, to guard against flooding in the event of a breakdown.

Retimbering of the old Cole shaft of the Calumet and Arizona Company will be complete this month, to be followed by an extensive campaign of development in ground that has again been brought into prominence by recent copper discoveries in the Warren district.

OIL CHAMBER PLANS BUILDING

Would Center Petroleum Industry Here

By K...

A special committee of the Chamber of Mines and Oil is reported to be making good progress in connection with plans for the erection of the proposed height-limit building which the chamber is sponsoring as a means of centralizing the petroleum industry in this city.

While no official announcements have been made in regard to the proposed structure, it is planned as a thirteen-story building, nine floors of which have been assigned to the Chamber of Mines and Oil. It is asserted that nearly five floors have already been leased by the building committee to oil companies and supply houses. The chamber is to have its office in the building.

The structure is to rise at the southeast corner of Tenth and Olive streets, the site being 150 feet on Tenth and eighty feet on Olive. The street-frontage is only a stone's throw from the Petroleum Securities Building and the Standard Oil Building.

The plans for this building call for a reinforced concrete and steel structure, capable of resisting fire and earthquake. There will be a basement garage capable of accommodating the automobiles of all the tenants.

NEW MINING OPERATIONS IN ARIZONA

Work on Two Properties in Wallapai Mountains to Commence Shortly

By K...

KINGMAN (Ariz.) Sept. 25. (Exclusive)—Operations are to be started soon in the north end of the Wallapai Mountains, twenty miles east of Kingman, where the United Republic and Century mines are reported to be amply financed.

The former is to have 200 feet of added depth, below the water level. Mill tests have been made of the complex century ore, which are to be treated by a fifty-ton selective flotation concentrator, for which the machinery now is en route.

Mrs. J. D. Spargo has transferred the Spargo group, near Chloride, to the Arizona Magna Company, a New York corporation, represented by W. H. McMillan. The ore is reported, though well suited to selective flotation processes.

A mill is contemplated on the Leavitt property, the older Leavitt section, for concentration of molybdenum ore found in a large deposit.

Three tons have been shipped for milling at Golden, Colo., the process to be supervised by George L. Pitt, who has been sampling the property. During the World War the Leavitt was a heavy producer of molybdenum, but it is appreciated that present prices for the product call for close economy in mining and milling.

PIETY HILL IN PLACER'S PATH

Hydraulics to Wipe out Last of Pioneer Town

By K...

SACRAMENTO, Sept. 25. (Exclusive)—Several hundred acres of placer ground at Downieville, including Piety Hill, the favorite residence section of the town in pioneer times, has been acquired by Lincoln Placer, controlled by Los Angeles capitalists. The townsite hill is to be sluiced into adjacent canyons by hydraulic monitors, and a vast amount of ground worked for its placer gold.

Surveys for a flume from the south fork of the Yuba River to Piety Hill have been completed, and construction of the reservoir is scheduled to start within thirty days. The reservoir is surrounded by properties that yielded rich returns in pioneer days and is expected by the new owners to develop into one of the largest placer mining enterprises in the State.

The Yellow Metals group of mining claims in the high Sierras, above Nevada City, has been acquired jointly by the Liberty Divide and Sierra Beam Divide companies of Nevada. Developments have begun with good reports to be showing in new ground. The property has produced some rich ore, with strong ledge indications.

The Grum Mining Company, working the Piety Hill quarter section, reports that the tunnel is still advancing on a vein four to five feet wide, with a streak of ribbon quartz showing considerable gold, exposed on the hanging wall side. The lateral has been driven 200 feet and is deemed to intersect the vein-system about 60 feet below surface.

Last-Minute News From Petroleum Fields; Reports From Marts of Trade

HEAVY DRILLING PROGRAM AFOOT

Midway Northern to Develop Holdings in Kern

Leases Taken on 3000 Acres Near Edison Field

Gilmore Company Takes Over Tract in District

BAKERSFIELD, Sept. 25. (Exclusive)—Planning a big drilling program in Kern county oil fields, the Midway Northern Oil Company has acquired leases on 3000 acres in the Edison field, twelve miles east of Bakersfield.

The land, lying in seven different sections, is reported to have been leased by Andrew Hancock from P. S. Brown, holder of thousands of acres in the area east of here.

The tract comprises the west half and the northwest quarter of the northwest quarter of Sec. 28, 29-30, all of Sec. 2, 30-30, the north halves of Secs. 9 and 10, 30-30, and portions of Secs. 29 and 32, 29-30, and Sec. 5, 30-30.

The Gilmore Oil Company has leased forty acres in the Edison district from Charles J. and Laura Rose, according to an agreement just filed.

Royalty is to be one-eighth, and after the third year of the lease, the oil company must drill or pay \$5 an acre per month rental for the first twelve months, and \$10 an acre per month for the second year.

MOUNTAIN LION'S COURAGE
The mountain lion is said, by observers sent out by the United States biological survey, to be the least courageous of the largest wild animals. The "big cats" are heavy, usually weighing around 150 pounds. They are extraordinarily strong and are very swift runners for short distances, but they will not show fight unless wounded and the mothers will desert their young at the approach of dogs.

RARE MINERALS, METALLURGY, CHEMISTRY

Books for Prospectors

LOS ANGELES, Sept. 7.—Question: I am a prospector and don't know enough to make good. I have been looking at several books but they are all so complicated and not enough to the point. I would like to have you suggest books for me. Hoping that you will do so.

Answer: Your criticism regarding "several books" is well taken, and, never doubt that you will make good!

You have good common sense, as shown by your letter. You certainly do not want books that attempt to teach mineralogy by physical characters only, nor those of rather recent date on "Rare Minerals," for the reason that one of such volumes is simply a reprint (possibly slightly changed) of "Kemp's Chemistry" of the 1861 model.

You should have "Ore Prospector's Guide," on minerals, ores, and petroleum prospecting. "The Handbook of Mineralogy," by Dr. J. C. Coe, 1888 (Van Nostrand, N. Y., publisher). Obtain a copy of "Steel's Fourteen Weeks in Geology," and buy one of the "Science Primer" books on "Chemistry," by H. E. Roscoe; the last three works were published by the American Book Company, New York, Cincinnati, and Chicago. The named volumes may be out of print, but probably can be obtained in book stores in Los Angeles at a cost of \$3 for the entire "bunch."

Native Gold Absent
WALNUT, Sept. 1.—Q: I'm sending samples from El Cajon district in San Diego county. Would you advise me for copper, gold and silver, or not?

A: The samples carry iron sulfide, iron oxides, slight lead sulfide, and slight arsenic. The taste of the specimens is nauseous. Cannot advise you regarding free assays, but copper present is doubtful, judging by the specimens.

Five Samples
LOS ANGELES, Sept. 8.—Q: The four samples of No. 1 were taken from Crystal Creek, near Lucerne Valley, San Bernardino county, California. No. 2 (one specimen) obtained from Lucerne Valley. Qualitative analyses on the specimens, please.

A: The four thumb specimens carry galena (lead sulfide), blende (zinc sulfide), cerussite (lead carbonate), ochreous lead, stibnite (antimony sulfide), and micaeous iron. All of the named products present in greater or lesser percentages. The grayish-white specimen No. 2 is a hydrous mixture of lime carbonate, clay, and hydrous magnesium silicate.

Two Specimens
LOS ANGELES, Sept. 8.—Q: The samples came from a vein in the Palos Verde hills. The brown clay is on one side of the yellowish clay, and the crystal on the other. They were so outstanding with the other veins or strata that my curiosity was aroused. Can you tell me if commercial values are indicated.

A: The crystal matter is gypsum. The yellowish, hydrous substance is a mixture of aluminum and magnesium silicates with iron pyrite (iron sulfide). Commercial values are indicated.

A Mixture
HANSBROUGH, Sept. 9.—Q: Inclosed you will find three samples, all taken from the same ledge in the Hansbrough mining district. Please let me know if they represent any commercial values.

A: The samples are very hard to determine by qualitative analyses, and they react for a great number of minerals from time up. The specimens were not numbered: two of the three carry oxides of iron and manganese, with antimony, zinc, lead and arsenic reactions. Titaniferous iron found. The third sample is of hornblende rock, iron oxides and titaniferous iron.

Free Gold Absent
ALHAMBRA, Sept. 9.—Q: Please test the six samples. Nos. 1 to 4 are from Ventura county north of Santa Monica. Nos. 5 and 6 are from north of Fenner, Cal. What metals, or minerals are in the specimens? Do any of them look fairly good? Thanking you for past favors.

A: Specimen No. 1 consists of a sample of shale hematite, with two of ferruginous quartz. No. 2 is a specimen of quartz carrying more or less limonite. No. 3 is a sample of iron, No. 4 altered rock; microscopic pyrite present. No. 5 altered rock; iron-manganese from time up in low percentage, and microscopic pyrite sparingly present. One sample, not numbered, reacts for zinc and copper traces.

Doubtful Nickel Ore
SANTA ANA, Sept. 10.—Q: Will you kindly advise through your "The Earth" column what the sample I am sending under separate cover. It was taken from a streak about twelve inches wide and I would like to know if silver is present. Could this formation contain nickel? This sample is from near Julian, San Diego county, Cal.

A: The specimens are quartzite rock mixed with more or less limonite (hydrous iron peroxide). Silver known to mineralogy, not present; free gold absent.

Retrospect Pyrophyllite
SAN DIEGO, Sept. 11.—Q: Please classify the sample. Locality, San Diego county, California.

A: The sample represents the best of all manganese ores for the reason that it carries more oxygen than any

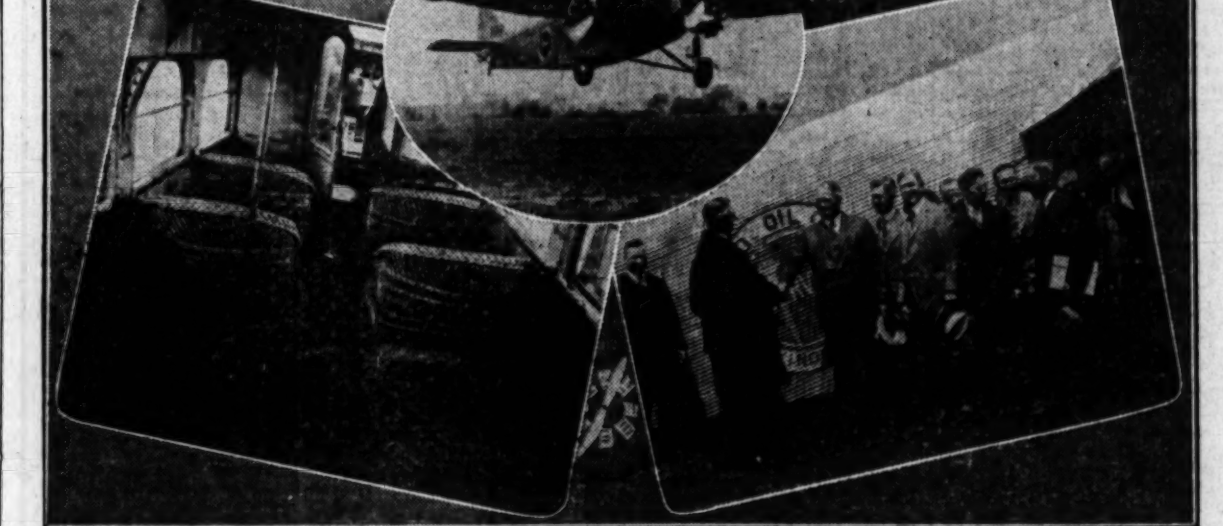

CRANE CO.
At a meeting of Board of Directors held September 25, 1927, the following resolution was adopted: That the company be authorized to issue ten percent (10%) of the common stock of the company, at the price of \$100 per share, in cash or in property, at the discretion of the board of directors.

FUEL OIL MOVEMENT HEAVY

Petroleum Exports Soar to New High Peak for Week; Gasoline Shipments Running Rather Light

High mark for recent weeks in the movement of bulk petroleum exports from Los Angeles Harbor was touched last week when the total reached 2,774,014 barrels. This makes a total of 7,291,043 barrels moved from this port during the first three weeks of September.

The unusual thing about last week's shipments was that 1,823,473 barrels consisted of fuel oil, while gasoline shipments dropped to the low level of 297,336 barrels. Thirty-nine vessels took oil loads from here during the week.

The Pacific domestic trade called for 927,579 barrels, including 481,349 barrels of crude, 250,203 barrels of fuel and 141,138 barrels of gas. The Pacific foreign trade called for 471,399 barrels, embracing 64,294 barrels of crude, 385,436 barrels of fuel, 22,069 barrels of diesel and 19,000 barrels of gas.

The Atlantic domestic trade took 728,407 barrels, including 478,208 barrels of fuel, 76,000 barrels of gas oil, and 74,201 barrels of gas. The Atlantic foreign trade took 646,529 barrels, embracing 442,529 barrels of fuel and 203,999 barrels of gas. The shipments were listed as follows:

PACIFIC FOREIGN
Kobe, Japan, to Yokohama, with 44,844 barrels of crude for Nippon Yusen Kaisha.
Yokohama to Kobe, with 24,494 barrels of fuel for Nippon Yusen Kaisha.
Yokohama to Kobe, with 24,494 barrels of fuel for Nippon Yusen Kaisha.

REPORTS OF ORE STRIKE CONFIRMED

Belmont Mining Opens Up Four-Foot Ledge of High Value on I.O.U. Claim

TONOPAH (Nev.) Sept. 25. (Exclusive)—Discovery of a four-foot ledge of splendid ore on the 800-foot level of the I.O.U. claim has been confirmed by P. W. Roney, manager of the Belmont Mining Company. The ore was opened in a virgin section of the old area, and is stated to average around \$20 per ton. It has been exposed for fifty feet and is believed by the management to have backs of 800 feet.

Confidence in a revival of the Divide district has been strengthened by the opening of promising ore in leases on the Verdi group, heavier shipments from the Brougher and announcement of plans for extensive work by the Belcher Extension, Victory, Brougher Extension and other companies. Since the first strike on the Brougher in the early part of July the lessees have shipped 750 tons of ore returning \$20 to \$40 per ton, and are maintaining production at an approximate rate of fifty tons to deepen the 100-foot level shaft to 200 feet. Lessees on the Tonopah Divide have opened new ore and increased production.

The Ben Hur Company announces that drifts on the seventy-five-foot level of its Anderson mine at Belcher have opened rich silver-gold ore. Assays say said to range from \$45 to \$850 .75 ton, with the ledge varying in width from two to three feet. The company has arranged to ship to the Thompson smelter, near Yerington, and has increased underground activities.

The Ben Hur Company announces that drifts on the seventy-five-foot level of its Anderson mine at Belcher have opened rich silver-gold ore. Assays say said to range from \$45 to \$850 .75 ton, with the ledge varying in width from two to three feet. The company has arranged to ship to the Thompson smelter, near Yerington, and has increased underground activities.

The Ben Hur Company announces that drifts on the seventy-five-foot level of its Anderson mine at Belcher have opened rich silver-gold ore. New Ore Strike of Importance at Four Aces

The Four Aces Mining Company of Los Angeles, operating the Three Queens mine in Placer county, in the performance of systematic development and exploratory work from the tunnel level of the old mine workings, reports having made a most important ore discovery in a cross-cut made from the ninety-seven foot level of the 115-foot mine, the full face of the workings being a body of solid quartz liberally sprinkled with gold in native form, and characteristic of the rich ore workings in the old workings of the property, where large tonnages have been blocked out awaiting extraction and mill treatment.

Importance is attached to the fact that the new discovery was made at a vertical depth of 319 feet from the surface and ninety-seven feet below the tunnel level. The strike, it is said, virtually places in sight a solid body of ore of excellent commercial grade, sixty-five feet between stopes and with ninety-seven feet of ore connecting with the ore showings in the old workings of the mine. The new discovery is reported to be a body of solid quartz liberally sprinkled with gold in native form, and characteristic of the rich ore workings in the old workings of the property, where large tonnages have been blocked out awaiting extraction and mill treatment.

Importance is attached to the fact that the new discovery was made at a vertical depth of 319 feet from the surface and ninety-seven feet below the tunnel level. The strike, it is said, virtually places in sight a solid body of ore of excellent commercial grade, sixty-five feet between stopes and with ninety-seven feet of ore connecting with the ore showings in the old workings of the mine. The new discovery is reported to be a body of solid quartz liberally sprinkled with gold in native form, and characteristic of the rich ore workings in the old workings of the property, where large tonnages have been blocked out awaiting extraction and mill treatment.

CLARINET SOLOS
STUDIO FEATUREClassic Selections Given by
A. W. SimpkinsHeart Songs Rendered by
Pasadena Violinist"Times" Aloha Quartet Adds
to Evening Program

BY DR. RALPH L. POWER

The evening broadcast over The Times station, KHL, yesterday featured the clarinet solos of A. W. Simpkins of Robert's Golden State Band.

The clarinet is a comparatively modern instrument. Mozart was the first great composer to give it a prominent place in the orchestra. Its tone is rich and expressive. The dramatic intensity of its lowest, or chalumeau, register, seems to have been undiscovered until Weber's use of it in the Freischütz overture.

With the single exception, perhaps, of the flute, no other wood-wind instrument can rival the clarinet in the execution of difficult, rapid passages. Its tone is rich and expressive. The dramatic intensity of its lowest, or chalumeau, register, seems to have been undiscovered until Weber's use of it in the Freischütz overture.

EFFECTIVE OVER RADIO

The bass clarinet, which sounds an octave lower than the clarinet, was first brought into prominence by Meyerbeer. Wagner and later composers have recognized its importance among the bass instruments of the wood-wind section. The tone of the bass clarinet is considered by many to be the most beautiful in the entire orchestra while for radio solo work it is splendid.

Mr. Simpkins' numbers on the entertainment broadcast included a Gypsy fantasy, "Bommbom," the theme and variations of which are by Thorstein, "La Brillante," by Jordan, and other selections.

Frederick MacKurray, Pasadena composer and regular Sunday night artist on the KHL radio program with the violin and viola, was another featured performer in the studio hour.

KING OF INSTRUMENTS

The supreme position of that most beautiful of all instruments, the violin, as a solo, chamber or orchestra instrument is universally recognized. The first great violin creator maker was Gaspara Da Salo, born in Brescia, about 1642. For two centuries Cremona was the home of three celebrated families of violin makers, the Amati, Stradivari and Guarneri.

The violin, which is a larger instrument than the viola, is lower in pitch. Its tone, compared with that of the violin, is less brilliant, more somber, yet unusually penetrating. As a solo instrument it has been somewhat neglected by composers. Its importance in chamber music and in the orchestra has always been recognized and in radio work the instrument has found a welcome from the radio audience.

Mr. MacKurray's broadcast numbers always include a collection of heart songs, old-time ballads and melodies of other days all of which make a tremendous appeal to the listeners at the receiving sets.

ALPHA QUARTET

The Times Aloha String Quartet furnished the group numbers on the studio broadcast including popular airs and tunes of the day, interspersed with piano solos by Clyde Jewett and steel guitar selections by Noah Allinor, both members of the quartet.

There will be no ball game from Wright Field via KHL this afternoon or tomorrow afternoon and fans will hear the next game on the air promptly at 2:15 Wednesday. This will be followed by the Thursday and Friday games. The Saturday game will not be put on the air because of the football broadcast and the closing double-header of the season will be over KHL at 1:30 p.m. Sunday.

Robbery Charge
Comes Up Today

Accused of the robbery of John A. Evans, real estate man, and Mrs. Evans, the latter's wife, as well as a passenger in their car, Mrs. Carl Grant, on July 12, last, Lewis Lennorville will be arraigned today in Superior Judge Edmonds' court on three counts of robbery.

It is charged that while the three asserted victims were riding in the car of Evans they were held up and robbed. The charges are based on a defendant obtained \$12 from Evans, a diamond ring, valued at \$1250, from Mrs. Evans and a diamond ring, valued at \$500 from Mrs. Grant.

TWO CLUBS GUESTS AT
BARBECUE AND DANCE

More than 300 members of El Vaquero and Las Vaqueritas clubs yesterday attended a barbecue and dance in Plummer hall, Santa Monica Boulevard and Vista avenue. They were guests of Senor Eugene R. Plummer, who delivered the address of welcome. A musical program followed with numbers by Emma Loeffler de Zarba, Senora Frances Plummer Contreras, and Mrs. V. E. Stockwell. Gen. Frank C. Probst gave a talk. The remainder of the day was given over to games and dancing.

For 1 Week

Do this if gaining schoolgirl complexion is your wish
By NORMA SHEARER

THIS is a very simple rule in skin care. Yet credited with more beautiful complexions than any other known. Youth is thus preserved, the charm of natural loveliness cultivated.

Wash the face gently with Palmolive. Massage its balmy olive and palm oil lather into the skin. Rinse with warm water; then with cold. That is nature's rule for keeping that schoolgirl complexion.

Largely on expert advice, millions use Palmolive Soap as above. And touch their faces with no others. For

PLAYHOUSE WILL REOPEN

Under new management, the local Playhouse will open October 5 with "Joan of Arkansas," a dramatic musical comedy with book and lyrics by Will Carleton and score by Kenneth Sheridan.

Rehearsals have now been in progress for the past ten days under the direction of Frank Bainger, who was brought on from New York by Carleton. The former has long been connected with such New York productions as "The Sign of the Cross" and "The Sign of the Cross."

Moose Dictator
Guest at Dinner

Al E. Comerford, dictator of Moose Lodge, No. 134, the largest Moose organization in Southern California, will be the guest of honor at a dinner given by the Los Angeles Lodge at the Windsor Hotel, Thursday night.

Mr. Comerford has just returned from the national convention at Philadelphia, where, under his leadership, the local lodge won for attendance and also captured the \$1000 award for the prettiest float. Greater Los Angeles, the float entered, was a miniature of the city showing a complete view from the City Hall to the sea.

TREASURE HUNTED

OFFICERS SEIZE LIQUOR AS IT COMES FROM GROUND

"Ah ha! Buried treasure," whispered Sgt. Simpson as he peered through a knot-hole in the fence back of 54th Street, fifteen feet. Quietly the sergeant summoned his fellow-vic-squad officers, Policemen Bon, Payne and Killey, to reinforce him from the rear.

The night was black as ink and not a mouse stirred as the law guardians breathlessly watched each shovel of dirt removed from the ground.

"Must be a pot of gold," chirped Sgt. Simpson. "Maybe we should help him."

"No, he's already down five feet," replied the night watchman. "He can't have much farther to go."

And the good sergeant was right. The grand prize was right at hand. It was a miniature of the city showing a complete view from the City Hall to the sea.

CLASS REGISTRATION
WILL CLOSE TONIGHT

The time when gentlemen wore ruffs and silver buckles will be discussed in a Monday evening class in "The Classical Period of Literature" for which registration will be completed tonight at University College, S. C. in the Transportation Building, Seventh and Los Angeles streets. Dr. Mildred Sprubel will head this lecture course to be given in the evening.

DIRECTOR DEFINES
USE OF CLOSE-UP

The exploitation of the much-abused close-up is perfectly justified when it is a question of portraying intensified feelings, according to Wesley Ruggles, Universal director, provided the exposure be taken with becoming caution.

It is a matter of congratulation that the tendency in recent years to break up each individual scene into a half-dozen close-ups, and with regard to this kind of picture beyond which it is impossible to go with impunity. When, for example, a single head or face is detached from its pictorial connection and made to fill the entire surface of the canvas, the effect is disagreeable, the impression unsympathetic.

CLASS WILL VISIT
ROCK FORMATIONS

Field trips to important geological formations near Los Angeles will be made by the class in geology of the extension division, University of California. It was announced yesterday by Dr. William J. Miller, instructor of the course, which will be conducted tonight in the Hillstreet Building. The class is one of many subjects in the new fall courses of the extension division. Romantic California from the first days of discovery to the present will be outlined in a colorful course to be given Wednesday evenings by Lucy M. Gains of the department of history, University of California at Los Angeles. She will also conduct a class tonight in history of modern Europe, political and social.

MINNESOTA ELECTED

KANSAS CITY, Sept. 25. (AP)—Henry Deutsch, Minneapolis lawyer, was elected president of the Association of Professional Men's Clubs at the closing session of its convention here yesterday.

SURPRISE
MARRIAGE
IS EVENTRyerson-Clements Wed-
ding Takes Place at Home
of BrideTwo noted names in the writing
world were joined last night when
Florence Ryerson and Colin Clements,
both associated with Metro-Goldwyn-
Mayer, and authors of many popular
magazine stories and novels, were
married at the home of the bride, 269
S. Maple Drive, Beverly Hills, in the
presence of a party of sixty guests
who included many of the best-
known writers in filmland.

Just by way of being a bit original, the wedding came as a surprise to the guests present, who had been invited to a party at Mrs. Ryerson's, and were told, following a buffet supper in the charming Spanish patio, that their hostess intended to be wed at once to one of her guests, Mr. Clements. While the engagement of the pair had been announced, the date of the wedding had not been set, to the knowledge of the friends of the two.

Mortenne Koepfl was maid of honor and Harry Behn, best man. The bride looked lovely in pale yellow chiffon, fastened in shades of pastel green, while the maid of honor wore shades of green and white. The bride was given away by J. C. Koepfl, an old friend of Mrs. Ryerson's family.

Among the noted guests present were Harry Rapf, Marion Blackton, Mr. and Mrs. Hugh Herbert, Mr. and Mrs. Rex Taylor, Mr. and Mrs. Harry Behn, Mr. and Mrs. E. H. Griffith, Robert Leonard, Gertrude O'Neil, Frank Dancy, Mrs. Charles Willard, Agnes Christine Johnson, Milton R. Warren, Cassidy, Verna Danks, Katherine Albert, Howard Strickland, Leigh Jacobson, Ruth Harriet Louise, Orlan Honey, and others.

The bride is the daughter of the late Charles Willard, managing editor for many years of the Evening Express, and a historian of note. His history of Los Angeles County being considered an authority on early Southern California history. Mrs. Ryerson inherited her father's talents. She was considered a genius as a play writer, when she wrote the play called "Wan of the Woods," which was produced at the Burbank Theatre, during the summer of 1924. She was married to Harold Ryerson, a Los Angeles official at present, and afterward began her writing career, during which she contributed to many popular magazines. She was divorced from Ryerson last year.

Clements, a married man, author of the popular novel, "Do Gentlemen Prefer Blondes?" They do not. He lived up to that statement by choosing a wife.

Mr. and Mrs. Clements do not expect to take a wedding trip until later next spring, when they are looking forward to a trip to Europe.

**Soprano and
Cadman Trio
Give Recital**

One of the first joint recitals of the season was presented last Saturday night by Florence Kaiser White, dramatic soprano, and Charles Wakefield Cadman, and it was a good-sized and appreciative audience that gathered at the Metropolitan Auditorium to enjoy the program.

Consisting of four groups of songs by the Cadman trio, the personnel of which includes Sol Cohen, violinist, Robert Alter, cellist, and Mr. Cadman, pianist, the evening proved an unusually interesting one.

Mrs. White's tones were clear and true and rang with a bell-like quality throughout the auditorium. She gave excellent interpretations to her numbers in every instance, the aria "Pace Mio Dio," being especially lovely.

Another of Mrs. White's selections that created enthusiasm was a group from "Divan of Hafiz" by Haring. The numbers included were "Heart Have You Heard the News," "Lullaby of the Beauty of the Moon," "Thine," and "Wind of the East."

The groups presented by the Cadman Trio were equally interesting, made the more so by the fact that the selections were all the work of the popular composer-pianist. The first included the Andante Cantabile and Allegro Moderato movements from his Trio in D Major, and the second, "Beethoven's Sunrise," "Havana's Love Song," and "Wolf Dance," from his ever-enthralling "Thunderbird Suite."

**Popularity of
Comedy Assured**

Edward Everett Horton, who for several years was hailed as one of the most popular stage idols on Los Angeles' own Broadway, has won the plaudits of thousands who have visited the Hollywood Music Box since his first appearance there in "So This Is Love," supported by Mrs. Reginald Denny.

Horton, funnier than ever, with his trick smile and comic shuffle, is cast in the current Music Box opus as a wealthy young bachelor who is much sought after by fortune-seeking adventuresses. The humorous situations and comic sequences which arise from the attempts of various charming young ladies to ensnare the actor are nothing short of mirth riots, according to the management.

Now in its second week, "So This Is Love" is settling down to entertain the multitudes of Los Angeles and Hollywood players.

"So This Is Love" is the first of a series of established New York comedy-drama hits in which Edward Everett Horton is to be starred at the Music Box, according to present plans. The cast includes Mabel Porter, J. Anthony Smythe, Robert Farwell, The Allen, Harding Mitchell, Harriet George and others.

Hailed as one of the most popular plays ever presented in the Orange Grove, "The Ruined Lady" also has reportedly one of the finest casts of players ever assembled on a local stage.

Cast as Ann Mortimer, Helen Bolton is seen in a role that is said to be exactly fitting a comedienne of her type. Davidson, as Bill, is seen as her bachelor sweetheart who falls to propose after a courtship of eight years.

Harold Summers Gives Demonstration
Island musician shows Dorothy Joyce (left) and Elizabeth Renard how to play popular instrument, with appropriate decorations.Harold Summers Gives Demonstration
Island musician shows Dorothy Joyce (left) and Elizabeth Renard how to play popular instrument, with appropriate decorations.Dr. Cable Trial
Date Set Today

Dr. Louise Cable, woman physician of Lankershim, accused of the murder of Ronald Frazzini, 14-year-old boy, is scheduled to appear in Superior Judge Edmonds' court today to have the date set for her second trial in the case. She already has been tried, but the jury failed to agree and was discharged.

Testimony in the trial was to the effect that the youth, his father, Damiano Frazzini and his brother, Albino, 16, were hunting rabbits when the younger boy entered the ranch of Dr. Cable and her husband, H. C. Cable. An argument ensued, resulting in the shooting of the boy by Dr. Cable, who asserts the shooting was accidental.

EASTERN BOY SOUGHT HERE

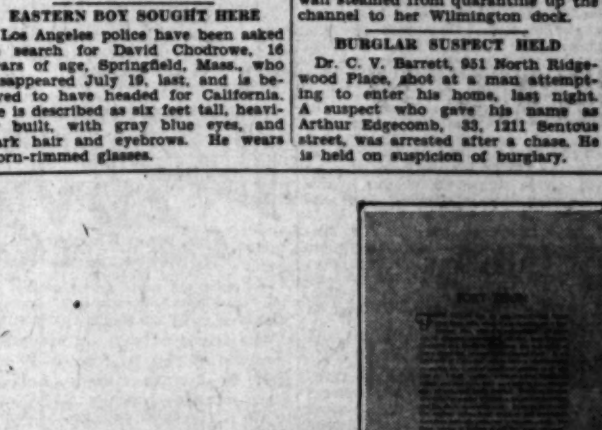

Los Angeles police have been asked to search for David Chodrow, 10 years of age, Springfield, Mass., who disappeared July 18, last, and is believed to have landed for California. He is described as six feet tall, heavily built, with gray blue eyes, and dark hair and eyebrows. He wears horn-rimmed glasses.

BURGULAR SUSPECT NEEDED

Dr. C. V. Barrett, 551 North Ridgewood Place, shot at a man attempting to enter his home, last night. A suspect who gave his name as Arthur Edgcomb, 33, 1311 Stevens street, was arrested after the chase, and is held on suspicion of burglary.

MRS. GRIMES TO RELATE VERSION

**Woman in Jacobson Case
Will Take Stand**

**What Happened on Night of
Raid to Be Told**

**Trial Scheduled to Begin
on October 5**

The story what transpired in her Beagle-straat cottage on the night of August 3, last, when she was arrested with Councilman Jacobson, was told yesterday by the woman who was said to be giving in court October 5 by Mrs. Caille Grimes, "the woman in the case," Defense Attorneys Hickson and Steffen announced yesterday. Mrs. Grimes will take the stand in her own defense. Accounts of the sensational trial, which has been the talk of the city, already have been related in Municipal Judge Willis's court by the officers on the raiding party, but Mrs. Grimes will give a more complete account of the events of the night of August 3. Councilman Jacobson did not take the witness stand at his trial, but he is expected to do so on the trial October 26 because of the disagreement between the jury and the court. Attorneys Hickson and Steffen have served a subpoena on the Councilman to appear as a defense witness at Mrs. Grimes' trial. Unless the woman's trial is continued again because of the illness of the jury, the trial will begin on October 26.

the official or his case. The second trial was disposed of in the meantime, he may expect to stand on his constitutional rights and refuse to testify, Hickson and Steffes said.

Mrs. Grimes has nothing to expect in this matter," her counsel said. "When the time comes she will take the stand and give her version of exactly what happened. She could appeal to her constitutional rights, but she has no intention of so doing."

While the preparations for the Grimess trial were under way, attorneys for the Councilman also announced that they intended to do battle at another court session in an effort to prove their clients were not in a compromising situation with the woman.

**STABBING AT
WATT'S LAID
TO OLD FEUD**

**Mexican Man Dying After
Knife Attack Credited to**

Two Later Arrested

Jesús Granados, 30 years of age, who lives at 18097 Londell street, Watts, is believed to be dying in the General Hospital from wounds received in the shooting. He was one of three of his fellow countrymen as a result of an old feud which had its origins when the four men were south of the border.

On information furnished the Los Angeles Police Department, men were stabling. Detective Lieutenant Valder arrested Augustin Hernandez, 28, of 10228 South Wilmington boulevard, Salvador Bahalos, and Odilon Bargas, 10228 South Wilmington Boulevard. Hernandez, who was found with a bullet wound in the back, was taken to the hospital with a deadly weapon.

Granados, who told the police that he was a victim of a "poling" man, can secret service. He declared that he was attacked by the three men because they were "poling" him. They carried him south of the border. He alleges that Hernandez and Bargas, in April, 1936, were involved in the slaying of nine men in Mexico.

The wounded man first was taken to the Georgia-street Receiving Hospital, where he was taken to the Police Surgeon-Savien, but because of his serious condition later was removed to the General Hospital.

Illinois Represented

Second State Patrols Kentucky to Remains in Hollywood

Former residents of Illinois will have an opportunity to meet their old friends and neighbors this week at the Hollywood Playhouse, where George M. Cohan's "Home Sweet Home" is being presented.

A lobby book has been placed in the lobby of the theater and in its membership book is a list of the names of the former residents of Illinois registered and "yet acquainted" with their former neighbors. Walter C. ...

During the opening week of the "Home-Town" requests were received by the management of the Hollywood Playhouse asking that they allow the various societies in Los Angeles the opportunity of having "home-town weeks" at the theater in conjunction with the playing of local plays.

The Kentuckians have just concluded their get-together week.

HIS START

"When I arrived here I had only a dollar in my pocket. With that small amount I was able to buy a ticket to the play 'The Merchant of Venice' and to get a good seat.

"What did you do with the dollar?"

"I read home for more." (Montreal Gazette.

Per Person One of Legal
by Dr. Frank Dyer

Lindsey's "Companionate Marriage" ideas, Dr. Frank Dyer, pastor of Wil-
son, last night at his "Forum of Youth"
such as the distinguished jurist ad-

LEGALIZED ENGAGEMENTS

In place of Judge Lindsey's trial union, Dr. Dyer said he would substitute a legal engagement, in which the man and woman would appear before a public official and swear their intention to wed. He said he would make that period of engagement as long as the couple desired, but that at the end of that time, if the parties believed they were suited to one another, they would be issued a license to wed.

He said he would limit the number of marriages in the lifetime of an individual to three.

Judge Shauer of Department No. 10 of the county court, in which divorce cases are now being heard, spoke at the forum. He said he believes that the American public is not ready to accept the suggestion of the marriage question so strikingly before it, though he said he cannot agree with the jurists that

Furniture, Household Goods at

A vertical strip of a film negative, showing a series of white, semi-circular shapes (likely sprocket holes or perforations) against a black background. The strip is oriented vertically, with the shapes appearing as a sequence of white arcs. The left edge of the strip shows the texture of the film material.
